Available July 2026 – Dec 2026

EDUCATION

Northeastern University

B.S. in Computer Science, Systems Concentration

May 2027 | MGPA: 3.6/4.0

Boston, MA

Coursework: Object-Oriented Design, Algorithms & Data Structures, Computer Systems, Digital Design & Computer Architecture, Cybersecurity, Discrete Structures, Math of Data Models

EXPERIENCE

Wolters Kluwer

Software Engineer

July 2025 – Present

Boston, MA

- Developed features for UpToDate evidence-based clinical reference platform used by 2M+ physicians globally
- Built "Expert Clinician AI" features using Vue and Java Spring, integrating LLM services into clinical decision support for 100K+ customers
- Implemented secure mobile tokenization API using Java Spring, enabling PCI-compliant payment processing
- Shipped 12+ production releases using Vue, Tailwind CSS, and Vite, increasing user engagement by 28%
- Collaborated with cross-functional Agile team and clinical stakeholders to deliver product features

SculptAI

Software Engineer

Jan. 2025 – June 2025

Remote

- Built full-stack features for AI-powered fitness app using React, TypeScript, Tailwind CSS, and Django
- Developed UI and PostgreSQL database for workout tracking, analytics, and personalized plans serving 2K+ users
- Integrated AI capabilities for rep counting and automated workout generation, contributing to \$1M funding

Chevron New Energies

Software Engineer Intern

May 2024 – Aug 2024

Houston, TX

- Integrated PyTorch models with AWS Neuron SDK for scalable ML inference, supporting 3M+ consumers globally
- Built RESTful APIs and data pipelines using Azure Data Factory, improving product efficiency by 40%
- Implemented CI/CD workflows using Azure DevOps and Kubernetes, cutting deployment times by 30%

Legacy Community Health

Software Engineer Intern

May 2023 – Aug 2023

Houston, TX

- Conducted peer code reviews and enforced coding standards for healthcare applications serving 100,000+ patients
- Collaborated with senior developers and clinical staff to translate healthcare requirements into technical solutions
- Debugged and resolved software defects in production Epic modules, ensuring 99.9% application uptime

PROJECTS

FinishLine | *React, TypeScript, PostgreSQL, Express*

Jan. 2024 – Present

- Engineered full-stack project management application using React, TypeScript, Express, and PostgreSQL
- Built RESTful API with authentication, financial tracking, and timeline management for team projects

Windows 11 Portfolio | *Next.js, React, TypeScript, Docker, Kubernetes*

Dec. 2023 – Present

- Built Windows 11-inspired portfolio with functional Bash terminal, LLM integration, and cloud-synced storage
- Containerized application with Docker multi-stage builds and deployed to Kubernetes with CI/CD pipeline
- Implemented full-stack features including media storage, file management, and interactive system components

Queen's Blood | *Java, Swing, AWT, JUnit*

Jan. 2025 – May 2025

- Built card game using MVC framework and Observer pattern, featuring AI opponents and grid-based gameplay
- Created comprehensive JUnit test suite with mock objects and edge case testing, achieving 100% code coverage

SKILLS & HONORS

Languages/Tools: JavaScript, Typescript, Python, Java, C++, Kotlin, Bash, PostgreSQL, AWS, GitHub, OracleSQL Developer, Jenkins, Groovy, Kubernetes, Docker, Azure Cloud Services

Frameworks & Libraries: React, Node.js, Vite, Pandas, TensorFlow, PyTorch, Django, Seaborn, Flask

Honors: Tech lead at Northeastern Electronic Racing, Dean's List (All Semesters), PawHacks
